Use Case Diagrams

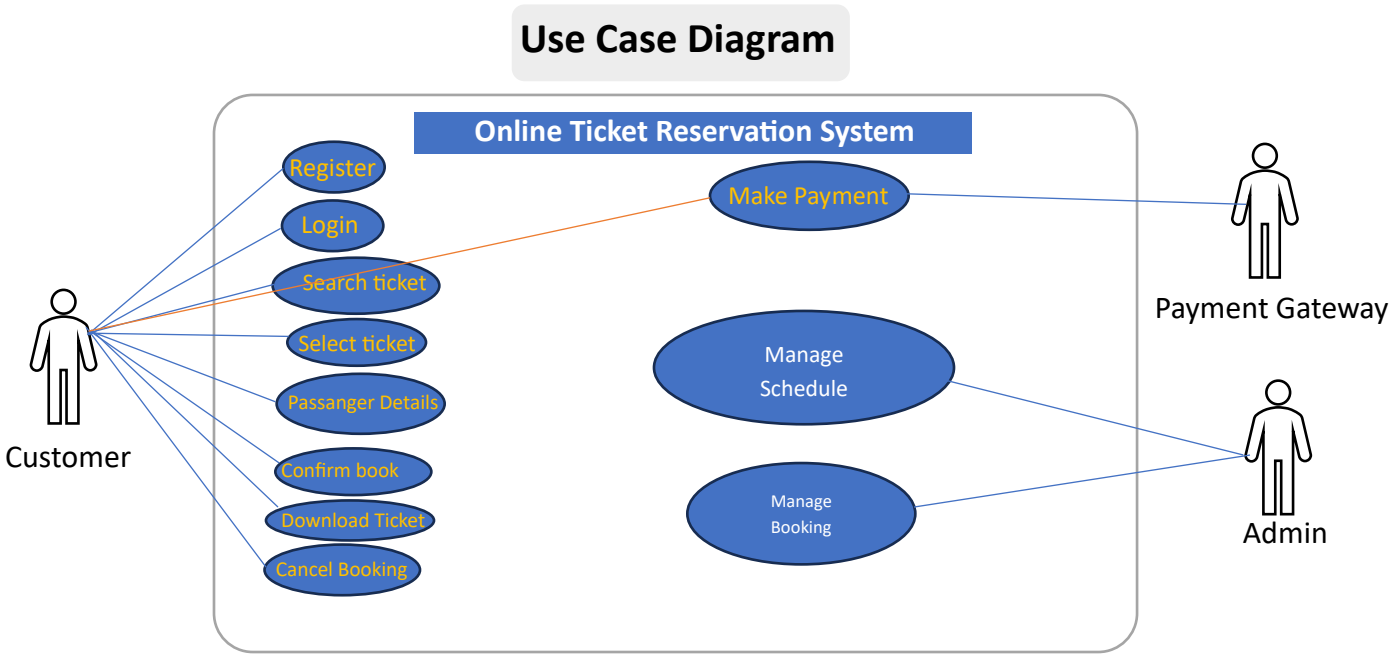

Q1: Online Ticket Reservation System

Actors

- Customer
- Payment Gateway
- Admin

Use Cases

- Register/Login
- Search Ticket
- Select Ticket
- Enter Passenger Details
- Make Payment
- Confirm Booking
- Download/Print Ticket
- Cancel Booking
- Manage Tickets (Admin)

Brief Explanation

The customer registers, logs in, searches for tickets, selects a ticket, enters passenger details, makes payment through the payment gateway, receives booking confirmation, downloads the ticket, or cancels the booking. The admin manages schedules and bookings.

Q2: Credit Card Processing System

Actors

Actor	Role
Customer	Selects an item and pays using a credit card
Vendor	Prepares bill, swipes card, and issues receipt
Credit Card Machine	Processes payment and prints receipt

Use Cases

- Select Item
- Generate Bill
- Swipe Credit Card
- Enter Transaction Amount
- Process Payment
- Print Balance/Receipt
- Sign Receipt
- Complete Transaction

Use Case Diagram

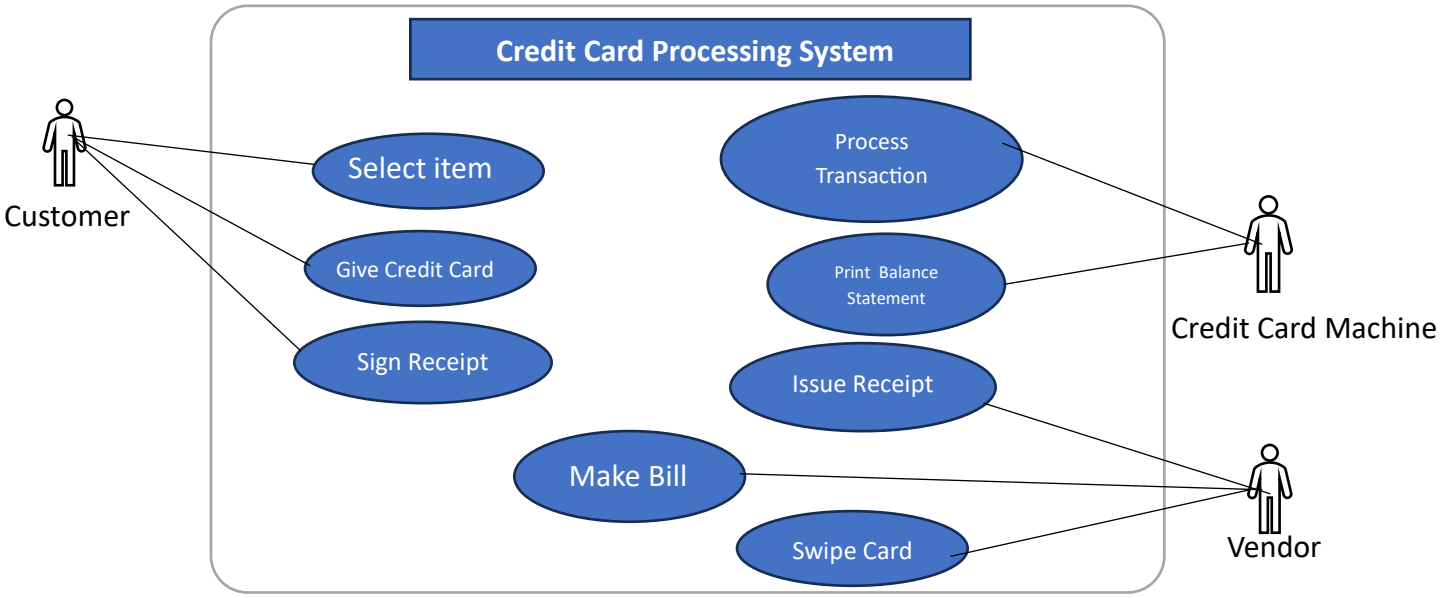

Figure 1 credit card processing system

Brief Explanation

1. The customer selects an item.
2. The vendor prepares the bill.
3. The customer gives the credit card.
4. The vendor swipes the card.
5. The credit card machine processes the transaction.
6. The machine prints the balance statement.
7. The vendor issues the receipt.
8. The customer signs the receipt and returns it to the vendor.
